

Dear Future Home Owner:

I wanted to take a moment to detail the experience my wife and I had when we decided to build our retirement home on Lake Gaston. With the help of a friend who had some education in architecture we designed a completely custom home that we thought would fit our needs. We showed the plans to five different builders on the lake and got ideas and bids from each. Of the five, we chose David Williams to build our house because his professional presentation made it obvious to us that he knew what he was talking about and had the resources to get the job done right.

We were not disappointed. From the beginning, when he presented the plans to a professional architect and engineer for their approval, right through to picking the paint colors, his advice and ideas were always right on. We were living in New Jersey when the house was being built and he kept us completely informed and updated as to how things were progressing in a very timely fashion giving us plenty of notice when we had to make any decisions. He would often send us photos via email so we could see how our choices looked in the actual house.

The sub contractors that David used were all excellent craftsman and did an outstanding job constructing the home, building the cabinets, putting in the trim work, painting, plumbing and putting in the electrical just to name a few.

As with any project of this size there are always going to be changes that you want as you go along. David worked very well with us to see that we got those changes incorporated into the home with very little disruption to the overall project.

We are happy to say that the house was completed on time and the quality of the work is unsurpassed. We did however go slightly over budget because we got carried away with some of the extras – all our fault. David's figures were always right on and he kept us informed of exactly how much we were spending all along the way.

We highly recommend David Williams Builders to anyone who wants a quality house built by an outstanding contractor.

Very Happily yours,

Joe and Sherry Zeno
